# Definition Flash Card App Tutorial

The following tutorial is for the Level 9 definition app. All the other levels will operate the same way. This is the first window you will see

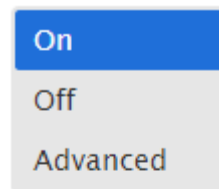

The blue area houses the various apps available.

Click on the "Cards" button to access the flash card app.

The text will be spoken. Set to "Off" if you do not wish to hear the spoken text.

Set to "Both Sides" when you are learning the material. When you wish to drill, set to "Term" or "Definition", depending on which side you wish to see first.
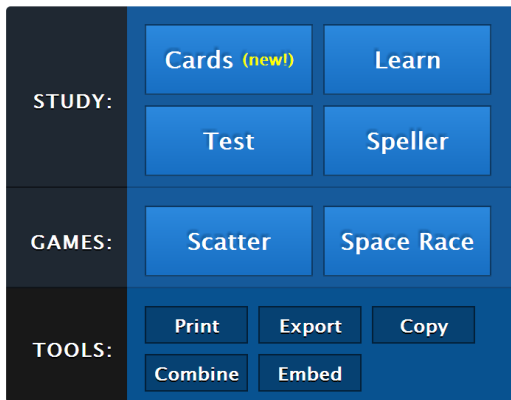

"Shuffle" randomizes the order of the terms.

"Play" enables the cards to be read automatically (you must have the spoken text set to "On").

Try the other activities: Learn, Test, Speller, Scatter or Space Race.
Note: some of these apps do not work well on a phone.

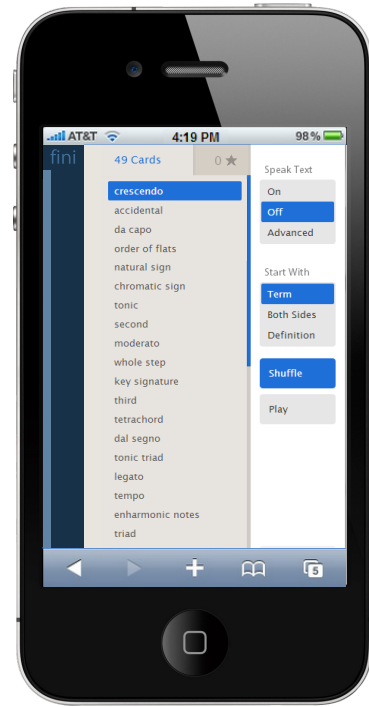

Using the Cards App on a Phone

On a smartphone the interface looks different, and the apps requires different actions from the user.

When you choose "Cards", the first flash card will appear as below:

Tap on the **RIGHT side**,

on the vertical blue streak to view the menu.

Tap on the **LEFT side**,

on the vertical light blue/gray streak to bring back the flash cards.

To see the other side of the flash card, place your finger down on the bottom portion (different shade of color) and drag it up.
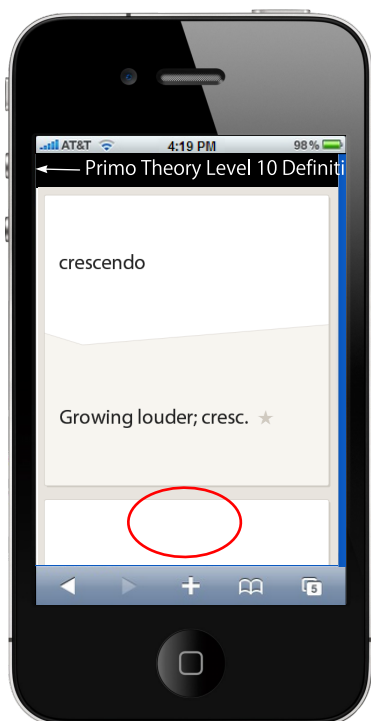

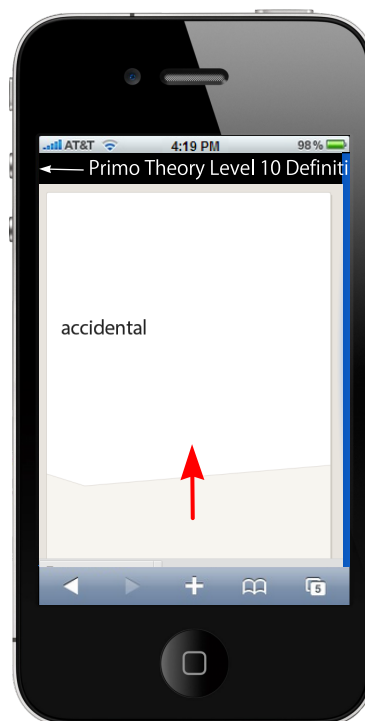

Now you can see the definition of the term.

Press and drag up.

To go to the next term, tap the viewable portion of the next card at the bottom (circled area).

The next term will slide up into view.

To go back to the main menu, tap on the title.
